### Overview

The Access Rosin Smart Agitation System is designed to optimize your rosin extraction process with precision and ease. Our advanced technology ensures consistent and superior yield quality every time. This guide provides comprehensive details on how to set up, operate, and maintain your system for optimal performance.

This user guide will walk you through the various components of the Smart Agitation System, offering step-by-step instructions, troubleshooting tips, and safety guidelines. Whether you are a novice or an experienced user, you will find all the information needed to make the most of your investment.

### System Components

The Smart Agitation System consists of several key components that work together seamlessly to deliver high-quality results. Understanding these parts will help you set up and maintain the system effectively.

The main components include the agitation device, control module, power supply, and various connectors and hoses. Detailed descriptions and diagrams of each component are provided in the sections below.

## **Installation Guide**

Proper installation of the Smart Agitation System is crucial for its optimal performance. Start by unboxing all components and ensuring that you have all the necessary parts as listed in the System Components section.

Follow the step-by-step instructions to connect each component. Begin by attaching the agitation device to the designated slot on the control module. Secure the connectors and hoses as specified in the manual to avoid leaks and ensure stability.

## **Setting Up the System**

Once your system is installed, you need to calibrate and set up the device for first-time use. Plug the power supply into a suitable outlet and turn on the control module. The interface will guide you through the initial setup process.

You'll be prompted to set parameters such as agitation speed, duration, and temperature. Refer to the best practices provided in the manual for optimal settings based on your specific needs.

## **Operation Procedures**

Operating the Smart Agitation System is straightforward once it's set up. Begin by loading your material into the agitation device as instructed. Close the lid securely and start the operation by pressing the start button on the control module.

The system will then begin its agitation process based on the parameters you've set. Monitor the process through the display on the control module and make adjustments if necessary. When the cycle is complete, the system will notify you with an alert.

## **Maintenance Tips**

Regular maintenance is essential for the longevity and efficiency of your Smart Agitation System. Clean the agitation device and any removable parts after each use to prevent residue buildup.

Perform periodic checks on connectors, hoses, and the control module to ensure everything is in good working condition. Replace any worn-out parts as needed to maintain optimal performance.

## **Troubleshooting**

If you encounter any issues during the operation of your Smart Agitation System, refer to the troubleshooting section in this guide. Common problems and their solutions are listed to help you quickly resolve any issues.

For problems not covered in the manual, you can reach out to our support team for further assistance. Make sure to have your device's model and serial number on hand when contacting support.

## **User Safety**

Your safety is our top priority. Always follow the safety guidelines provided in this manual to avoid accidents and injuries. Wear appropriate protective gear when handling hot materials or equipment.

Ensure that the area around the Smart Agitation System is clean and free of obstructions. Never operate the system with wet hands or in a wet environment to prevent electrical hazards.

## **Seeking Help**

If you need any help or have questions about your Smart Agitation System, our customer support team is here to assist you. Contact us via email at [sales@accessrosin.com](mailto:sales@accessrosin.com) or call us at (949) 373-5337.

We also offer resources on our website at <http://www.accessrosin.com> for additional support and information. Our team is dedicated to ensuring you get the most out of your Smart Agitation System.

## **Providing Feedback**

We value your feedback and strive to improve our products and services continually. If you have any suggestions, comments, or experiences to share, please contact us via email at [sales@accessrosin.com](mailto:sales@accessrosin.com) or call us at (949) 373-5337.

Your input helps us enhance our offerings and better serve our customers. Thank you for choosing Access Rosin's Smart Agitation System.
